install service and meter? PART B PREFERRED METER OR SERVICE LOCATION						
7.11.1. 5.1.12.1 21.1.1252.12.11.01.02.13.03.1						
Service to be installed from which street Service Meter Bar Installed Y/N						
The Retailer will arrange the installation of a network service and basic metering facilities, in accordance						
with the Network Code and network management plan, to the property boundary, subject to gas being available from an accessible gas main.						
If the customer chooses to install the meter on the front boundary then the consumer is responsible for the cost and installation of the consumer piping from the meter position, on the property boundary, to their						
premise. This work must be done by a Network accredited installer. If the applicant requires a basic metering facility to be located at a point other than the property boundary,						
the consumer will be required to pay for the additional cost.						
Note 1. Acceptable meter location highlighted by white area one metre from Note 3						
the boundary. Note 2: Meter can be located at the rear boundary if an accessible gas main is Service Length: Note 1						
available and the meter is protected from third party damage. The meter must be accessible for meter reading and emergency access. Front Boundary						
Note 3: Meter can be located on building where indicated. The meter must be accessible for meter reading and emergency access. Place X for preferred meter location - white area
